

General Special Provision Revisions Effective April 5, 2004

Please Note: The following list is a brief overview of each revision. The actual amendment should be reviewed in depth to become completely knowledgeable of the revision. In addition, a more detailed history of these changes can be reviewed through the Construction Office's database at <http://wwwi.wsdot.wa.gov/eesc/cons/admin.cfm> under the heading **Amendment and GSP Tracking**.

General Special Provision 04051B.GR1 Protest Procedures

This is a new special provision that outlines additional Pre-award Protests for projects that contain Federal Transit Authority (FTA) funding. This was implemented because FTA did not feel our specifications fully met their needs.

General Special Provision 0723012.GR1 Safety Zone

This special provision was revised to correct a gap in the speed zones. The way it was written, 60 MPH safety zones were not covered, therefore the third sentence in the GSP was revised to correct the situation.

General Special Provision 12026.GR2 Geotextile Properties

This heading of this GSP was revised to read "*Geotextile Properties For Retaining Walls and Reinforcing*".

General Special Provision 120264.FR2 Geosynthetic Properties for Reinforced Slopes

This provision was updated to reflect the changes made in the total rewrite of Standard Specification 9-33.

General Special Provision 120273.GR2 Geosynthetic Reinforced Slope Primary Reinforcement

This provision was updated to reflect the changes made in the total rewrite of Standard Specification 9-33.

General Special Provision 040308A1.GR5 Acceptance Sampling and Testing – HMA Mixture

This special provision was revised to correct a sieve size and delete the No.6 and No.100 sieve sizes contained in the deviation chart used to evaluate a challenge by the contractor. It also clarified when the field test results would be supplied to the contractor.

General Special Provision 04027.GR5 HMA Tolerances and Adjustments

This special provision was moved to from Section 5 to Section 9 and now is assigned GSP number 03087.GR9.

General Special Provision 040303A.GR5 Material Transfer Device/Vehicle

This special provision was added as we now have statewide concurrence on what was traditionally added as a Region General Special Provision.

General Special Provision 080211.GB6 Membrane Waterproofing System

This System C Materials section of this special provision has been revised to reflect the shift from AR grades of asphalt to the PG paving grades of asphalt.

General Special Provision 200225.GR8 Traffic Signal Standards

This special provision was revised to reflect changes in the preapproved drawings for the Union Metal Corporation.

General Special Provision 200226.GR8 Traffic Signal Standards

This special provision was revised to reflect changes in the preapproved drawings for the Union Metal Corporation.

In addition to the above changes, all of the remaining GSPs involving Noise Barrier Walls, Structural Earth Walls, Geosynthetic Retaining Walls, Soil Nail Walls, Soldier Pile and Soldier Pile Tieback Walls, Permanent Ground Anchors, and Shotcrete Facing, that were not elevated to an amendment in the new Standard Specifications 6-12, 6-13, 6-14, 6-15, 6-16, 6-17, and 6-18 were renumbered accordingly to reflect the addition of these new amendment sections.

Please, also be aware of the following GSP deletions due to the addition of the new sections of the Standard Specifications.

12011.GR2	12021.GR2	120221.GR2	120251.GR2	120261.GR2	120262.FR2
